

Multi-Polar Magnet

Have you ever felt weakened or tired while walking in the mall, in a supermarket or a store? Research shows electromagnetic pollution is strongly affecting our health. Cell phones, home computer, laptops, overhead power lines, fluorescent lights, microwave ovens, TV's, video game stations and even hair dryers and other electrical appliances are a detriment to our energy and well-being.

The potentially harmful electromagnetic field set up by alternating currents (AC electricity- which runs our electrical appliances) interferes with our own energy field and nerve system, which is direct current. Our electro-magnetic energy is life itself!

The Earth is a giant magnet with a North and South Pole. Researchers tell us the Earth's magnetic field used to be 4 gauss (gauss is a unit of magnetic strength). Currently, the Earth's magnetic influence is only ½ gauss due to climate changes, atomic bombs and other environmental factors. Our body is measured at 1 gauss, and therefore, is literally being drained due to this change in the Earth's field. A delicate balance exists in our body's electromagnetic energy. According to William Philpott, MD, our energy field is our first line of defense even before our immune system against the overgrowth of disease causing organisms. This is why it is so important to preserve or upgrade our energy field to protect us.

As part of our Total Health Scan, we test your body for electromagnetic interference. Using Applied Kinesiology, we test a muscle (arm or leg muscle) to find out if it is strong. If strong, we have you place your hand on a computer keyboard or hold a cell phone to your ear and retest your muscle strength. Many times we find this weakens a previously strong muscle immediately. Think of what happens to your body if it is in a weakened state much of the day with a cell phone in your pocket and if you are using a computer for many hours! This weakening effect happens to us day in and day out because of these electric alternating currents.

So, how do we protect ourselves from these harmful effects? Even though we cannot do away with all these abnormal bombardments, we can protect ourselves. Use of a multi-polar magnet, which is no bigger than a credit card, will boost our energy field and protect us. During the Total Health Scan, we have you hold a multi-polar magnet while touching the computer keyboard or holding the cell phone again. Where your muscle was previously weak, we will find that your muscle tests much stronger with the magnet which indicates that the harmful effects have been neutralized. Continued use of the multi-polar magnet often results in more energy over time.

These magnets have also been found to be helpful in pain reduction. You may place them over a painful area and leave it there. Sometimes placing the magnet in the exact same place on the opposite side of the body will help as well due to the effects on acupuncture meridian pathways of the body. Other benefits have been found other than increase energy and acute pain relief- this simple magnet can relieve chronic pain in such conditions as headaches, neck and back pain, carpal tunnel syndrome, arthritis, tennis elbow, and old injuries.

Multi-polar magnets are different than the magnets you may put on the refrigerator. Those magnets are bipolar - not multi-polar. Our multi-polar are low intensity to keep in line with our body's energy field. Some magnets sold in mattress pads, pillows or worn as wristbands or necklaces are much too strong for our body's energy field. If you use any of these appliances, please bring them in for us to test for you to see if they are appropriate for your body's use. Our magnet works on the same principle but is much simpler and less expensive.

We recommend that you place the magnet in your back pocket with the cloth side facing your body and the shiny side facing outward. (Some women find it simple to place the magnet in the side of their bra) We recommend people wear the magnet all day. Some people feel they need more energy and place it under the mattress pad- several magnets may be needed for this purpose.

Please share this information with your family and others. We are happy to test them for the need of this important support. Many people do not know how irritating daily use of electronics, cell phones and computer can be.
A simple magnet can help a lot!!

Magnets can be purchased or ordered at:

Lowey Chiropractic Wellness Center
